

SUITABLE FOR

FOOTBALL

## GREENFIELDS MX NF

### INTRODUCING THE NEW GENERATION OF ARTIFICIAL TURF

#### Key benefits:

- Great playability - natural behaviour
- Natural look and feel
- No intentionally added microplastics
- Easier to install and maintain
- 100% recyclable for high end applications

Engineered to match the performance of good quality natural turf. The pile consists of resilient but soft to the touch pile yarns in two different shapes combined with a voluminous air texturized thatch layer replacing the performance infill. The three tones of green and random weaving pattern result in an even yarn spread over the surface for a natural look and consistent performance in all directions.

Patented woven technology results in a superior yarn bind and forces the fibres to stand even straighter, ensuring the foot lands naturally on the turf. As this product is entirely made out of polyolefins and it doesn't need any infill, it is easier to recycle into quality granules for new applications.

A "lay and play" solution that is faster to install and easier to maintain. This non-fill product eliminates the need for infill decompaction or top up. Surrounding areas stay cleaner too as there is no migration of infill. The GreenFields MX NF has the look and feel of natural turf, durability and playing hours of artificial turf.

# YOUR PERFORMANCE

This GreenFields performance chart gives a first indication of the relative performance compared to our other products in the same category. GreenFields offers a perfect pitch for every player, and can provide a product that best suits your needs. For further advice, please consult your GreenFields sales representative.

**BALL SURFACE INTERACTION**  
Covers the relative performance for vertical and angled ball rebound, ball roll and shock absorption.

**PLAYER SURFACE INTERACTION**  
Reflects the relative score on optimal grip, skin comfort, hardness and surface impact.

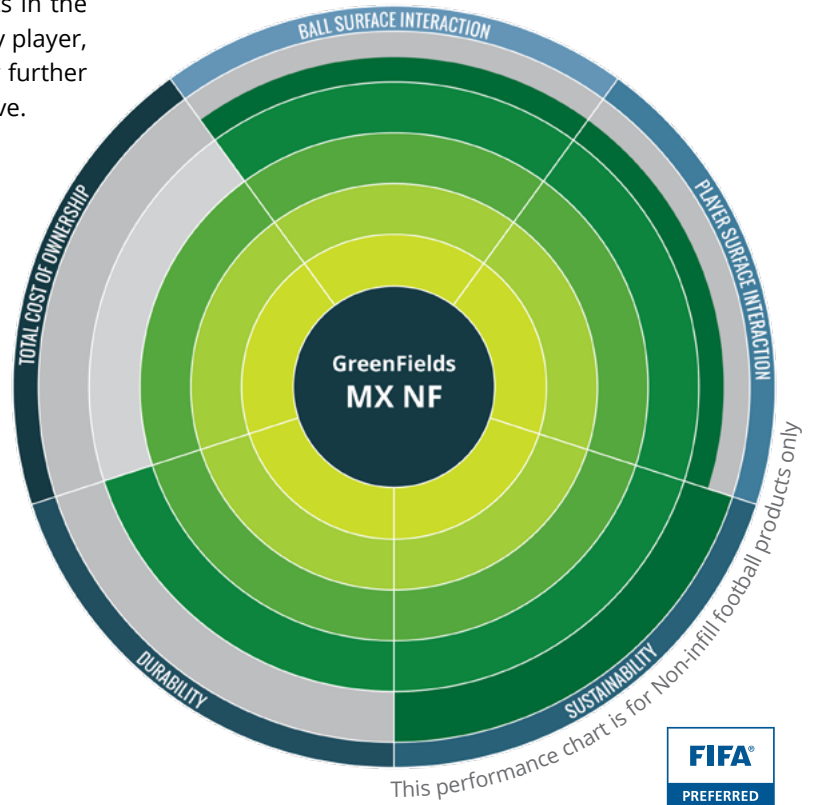

**SUSTAINABILITY**  
Covers infill sustainability, potential infill migration, material footprint and recyclability.

**DURABILITY**  
Reflects the relative durability of the carpet in terms of fibre wear and strength, color fastness and yarn bind.

**TOTAL COST OF OWNERSHIP**  
Reflects the relative costs of the carpet, system components, maintenance and end of life.
